**RE: DRAFT Wyoming Cultural Properties Form and Contributing List**  
Capitol North Historic District Expansion  
Terracon Project No. 24187019

Ms. Lowe:

Terracon is pleased to submit the Draft Wyoming Cultural Properties Forms and Contributing List for the Capitol North Historic District Expansion for your review and comment. The survey forms present data from the June field survey of the Capitol North Historic District. The Terracon project team evaluated the results of the field survey and recommends a revised historic district expansion district boundary (*Attachment C, Exhibit 1*) and a total of 84 contributing resources, out of a total of 134 resources within the expanded district. Preliminary research indicates the period of significance will be expanded to include post-World War II and mid-century residential buildings that represent the final build-out of the neighborhood. The updated and expanded Capitol North Historic District will include a recommended 197 Contributing resources, representing 79% of all resources within the expanded district.

Terracon will address all comments from the City of Cheyenne and will then transmit the survey forms to the Wyoming State Historic Preservation Office (SHPO) for their review and comment. Upon concurrence by the Wyoming SHPO with the recommendations for the Capitol North Historic District expansion, Terracon will proceed with the preparation of the updated National Register of Historic Places nomination for the historic district.

Terracon appreciates this opportunity to provide historic preservation services to the City of Cheyenne. Should you have any questions or require additional information regarding this first deliverable, please do not hesitate to contact our office.

Sincerely,

A handwritten signature in blue ink, reading "S. Elizabeth Valenzuela", is positioned above a horizontal line.

S. Elizabeth Valenzuela  
Project Manager

A handwritten signature in blue ink, reading "Ann M. Scott", is positioned above a horizontal line.

Ann M. Scott, Ph.D., R.P.A.  
Authorized Project Reviewer

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

N/A**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

N/A**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

N/A

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**ARCHITECTURE KEYWORDS:** Wood shingle, symmetrical, segmented pediment, portico, shuttered windows**ADDITIONAL NARRATIVE**

Two-story single-family Colonial Revival style residence with a symmetrical façade rectangular in design. The roof is a medium pitch with narrow eaves and side gables. Multi-pane eight-over-eight and six-over-six light double-hung windows are detailed with correctly proportioned shutters. The front entrance is centered in the façade and accented with columns. The entry is hooded creating a covered porch. There is a fanlight over the paneled front door and sidelights on each side of the front entry. The exterior is wood shingle. There are two chimneys with chimney pots symmetrically place on each gable end.

**DESCRIPTION**

Architectural Style	Late 19th & 20th Century Revivals: Tudor Revival		
Foundation Type	Concrete wall	Foundation Material	Concrete
Number of Stories	1		

Date Friday, August 10, 2018

Smithsonian Number

N/A

Roof Type	Hip-on-Gable		Roof Materials	Asphalt	
Structural System					
Cladding	Wood, Brick, Stucco				
Window Configuration (primary)	Four-over-One	Window Materials (primary)			
Windows Configuration (secondary)		Window Materials (secondary)			
Porches	0				
Chimneys	1				
Basement	Yes				
Modifications	Windows, Door,				
Landscaping	CMU planters, concrete and paver sidewalk to primary entrance				

**ARCHITECTURE KEYWORDS:** Half-timbering, Tudor Revival, hip roof**ADDITIONAL NARRATIVE**

One-story single-family residence exhibiting characteristics of the Tudor Revival style. Asymmetric front facing gable. Brick siding at exterior with stucco half-timbering at gable. Simple wood casements surround the front windows with a flower window box beneath. The front windows are four-over-one wood. The hip roof has wide eaves creating an overhang for the front entry. A five-step wood staircase with wood handrails and accessible ramp provide front entry access.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**ARCHITECTURE KEYWORDS:** Prairie School, cascade hip roof, belt course**ADDITIONAL NARRATIVE**

One-story single-family residence exhibiting characteristics of the Prairie School style. Asymmetric design incorporating a medium-sloped cascading hip roof with wide eaves and exposed rafters. Simple woodwork casements surround the front door and windows. The front windows are three-over-one and four-over-one wood and are set individually or as a group of three. The exterior cladding is horizontal brick siding with a belt course surround. There is a gable roof projection over the front entry with an stucco arch. A four-step concrete staircase with single metal handrail provides front entry access.

Modifications	Windows, siding, doors, rear addition			
Landscaping	Concrete sidewalk to primary and secondary entrances, grass lawn, mature shrubs and trees, flower beds			

**ARCHITECTURE KEYWORDS:** Balcony, brackets, board-and-batten siding, squat columns, exposed rafter tails**ADDITIONAL NARRATIVE**

1.5-story single-family residence exhibiting characteristics of the Craftsman style. Asymmetric side facing gable hip roof with front porch and wing. The exterior cladding is brick, stucco and board-and-batten siding. Simple wood casements surround the one-over-one vinyl front windows. The medium-sloped hip roof has wide eaves with exposed rafter tails. A five-step concrete staircase with squat columns provides front entry access. There is a dormer-style balcony projecting from the front hip roof accessed by a single multi-light door bracketed by two one-over-one vinyl windows. A wood railing surrounds the second story balcony.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**DESCRIPTION**

Architectural Style	Late 19th & Early 20th Century American Movements: Bungalow/Craftsman		
Foundation Type	Concrete wall	Foundation Material	Concrete
Number of Stories	1		

Date Friday, August 10, 2018

Smithsonian Number

N/A

Roof Type	Cross-gabled	Roof Materials	Asphalt
Structural System			
Cladding	Wood: shingle		
Window Configuration (primary)	one-over-one	Window Materials (primary)	Synthetics: vinyl
Windows Configuration (secondary)		Window Materials (secondary)	
Porches	1		
Chimneys			
Basement			
Modifications	An accessible ramp leads from the front porch along the side of the house.		
Landscaping	Concrete sidewalk to primary entrance, grass lawn		

**ARCHITECTURE KEYWORDS:** Exposed rafter tails, decorative brackets, Craftsman**ADDITIONAL NARRATIVE**

One-story single-family residence exhibiting characteristics of the Craftsman style. The asymmetric design features a front porch and wing. The medium-sloped cross-gable roof incorporates wide eaves and exposed rafter tails with decorative brackets. The exterior cladding is wood shingle siding. Simple wood casements and shutters surround the one-over-one vinyl front windows. The windows are set in two 3-window side-by-side groupings. A six-step wood staircase with three wood handrails provides front entry access. A wood railing surrounds the front porch perimeter.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**ARCHITECTURE KEYWORDS:** Exposed rafter tails, decorative brackets, balcony, Craftsman**ADDITIONAL NARRATIVE**

1.5-story single-family residence exhibiting characteristics of the Craftsman style. The asymmetric design features a front porch and wing. The medium-sloped side-gable roof incorporates wide eaves and exposed rafter tails with decorative brackets. The exterior cladding is vinyl siding. Simple wood casements and shutters surround the one-over-one vinyl front windows. The windows are set individually, in a 2-window side-by-side grouping, and in a 4-window side-by-side grouping. A six-step wood staircase with wood handrails provides front entry access. A wood railing surrounds the front porch perimeter. There is a dormer-style double balcony projecting from the front roof that integrates a side gable with exposed rafter tails. The balcony is accessed by two eight-light doors. Each door is paired with a one-over-one vinyl window. A metal railing protects the second story balcony.

**ARCHITECTURE KEYWORDS:** Tudor Revival, Casement Window, Brick Belt Course

**ADDITIONAL NARRATIVE**

One-story single-family residence exhibiting characteristics of the Tudor Revival style. The asymmetric design incorporates a cross-gable roof. The exterior is composed of horizontal brick siding with a vertical brick belt course. The windows are metal-framed 24-light with twelve fixed panes surrounding two two-by-three-light casement inserts. A vertical brick course furnishes a sill feature under each window. The gable roof has narrow enclosed eaves. A flat roof trellis-style projection provides a porch roof over the front entry. Decorative metal columns support the front porch roof overhang. A three-step concrete staircase with squat brick columns provides front entry access.

**8F. HISTORIC ARCHITECTURE COMPONENT DESCRIPTION**

Instructions: Complete this form for each primary standing building/structure as appropriate. If a site contains more than one building or structure, e.g. a ranch house and barn – complete an attachment for each structure. When using this form, structures should retain identifiable architectural elements. Generally, historic archeological sites should not be recorded on this form. Secondary structures such as corrals, fences, lean-to's, and outbuildings without architectural interest, may be documented on attachment 8D. Attach a sketch map showing the building, associated features and other buildings and the building setting as appropriate (with a scale and north arrow). Attach color photographs or images sufficient to illustrate the general building form and condition. Attach photographs, images, or measured drawings of unique architectural elements. Additional records (e.g., blueprints) can be attached as appropriate. References for this section include: Architecture in the Cowboy State; Eileen F. Starr, 1992; "National Register Bulletin 15", USDI/ NPS, 1991; A Field Guide to American Houses, Virginia Lee McAlester, 1984.

**ARCHITECTURE KEYWORDS:** Tudor Revival, front entry projection**ADDITIONAL NARRATIVE**

One-story single-family residence exhibiting characteristics of the Tudor Revival style. The symmetric design incorporates a cross-gable roof with a front entry projection. The exterior is composed of wood weatherboard siding. The windows are wood-framed three-over-one. A decorative wood casement surrounds the windows and furnishes a sill feature under each window. The gable roof has narrow enclosed eaves. A four-step concrete staircase with squat concrete sides provides front entry access.

**DESCRIPTION**

Architectural Style	Modern Movement: Ranch		
Foundation Type	Concrete slab	Foundation Material	Concrete
Number of Stories	1		

Date Friday, August 10, 2018

Smithsonian Number

N/A

Roof Type	Flat roof with overhang		Roof Materials	Asphalt
Structural System				
Cladding	Brick			
Window Configuration (primary)	Single light casement	Window Materials (primary)	Wood	
Windows Configuration (secondary)		Window Materials (secondary)		
Porches	0			
Chimneys	1			
Basement	No			
Modifications				
Landscaping	Concrete sidewalk to primary entrance, grass lawn			

**ARCHITECTURE KEYWORDS:** Ranch, flat roof, overhanging eave**ADDITIONAL NARRATIVE**

One-story single-family residence exhibiting characteristics of the Modern Ranch style. The asymmetric design incorporates a flat roof with wide overhanging eaves. Simple wood casements surround five single-light casement windows arranged in a 5-window grouping. The exterior cladding is wood siding. The roof eave projects across the front elevation creating a partially covered front entry. The front entry is at grade level.

House at 3125 Bent Avenue
