

CORNBELT DEFOAMER

CORNBELT ® DEFOAMER is a highly effective foam destabilizer containing 10% silicon solids for use in suppressing foam in most aqueous spray systems.

READ DIRECTIONS BEFORE USING

*Principal Functioning Agent
Dimethylpolysiloxane*

DIRECTIONS FOR USE

For Best Results: Spray directly into liquid before foaming starts.

To control existing foam: Stop tank agitation, if possible, and spray CORNBELT® DEFOAMER in a zig-zag pattern across the surface of the foam with the spray directed at the surface of the liquid. USE SPARINGLY.

A small amount is usually sufficient to reduce most foams to acceptable levels.

NOTICE OF WARRANTY

The Seller makes no warranty expressed or implied concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use or handling is contrary to label instructions.
